

SOORYA DURAIRAJ

Technical Support Engineer

PERSONAL INFORMATION

Address : Neelkamal apartment, Kazhipattur, Chennai – 603103
Email : sooryadefence@gmail.com
Phone : +917708721878

SUMMARY

With 2 year of experience as an Technical Support Engineer at TCS in the telecom domain, I've developed robust troubleshooting skills in a dynamic, live environment ensuring seamless system operations and rapid issue resolution to maintain uninterrupted service. Complementing this, I completed a 6-month Flutter internship where I focused on crafting user-friendly, efficient mobile applications. This unique blend of hands-on support expertise and development experience positions me to contribute effectively to innovative projects while advancing my career in app development and system support.

WORK EXPERIENCE

Service Professional Feb 2024 – Present
Tata Consultancy Service

Project: **BT – British Telecom (Data Integrity Team)**

- Work as part of the Data Integrity Team, ensuring accurate data management for BT's core services, including:
 - **Landline** services
 - **Mobile telephony** (SIM plans, network services)
 - **Broadband** (internet services)
 - **Digital television** (BT TV, streaming services)
 - **Telecommunications equipment** (routers, modems, hardware support)
- Perform manual data validation and quality checks, ensuring service accuracy and reliability.
- Identify and resolve data discrepancies, contributing to improved customer experience and operational efficiency.
- Collaborate with internal teams to enhance data workflows, process efficiency, and quality control.
- Document and escalate complex data-related issues to relevant teams for swift resolution.

Flutter Developer July 2023 – Nov 2023
Hysas Technologies pvt Ltd

- Contributed to **Pocket Giving**, a UK-based charity app, assisting with Flutter development and integrations.
- Developed **Cine App** (movie streaming) and **Food Order App** (food ordering).
- Worked with Flutter & Dart, integrating **GraphQL & RESTful APIs** for efficient data handling.
- Utilized **Cloudinary** for media storage and **Hasura** for real-time database management.
- Implemented **RazorPay** for payments and **Firebase Authentication** for secure access.
