

SOORYA DURAIRAJ

Application Support Engineer

BASIC INFORMATION

Neelkamal apartment, Kazhipattur, 603103 Chennai
sooryadefence@gmail.com, +917708721878

SUMMARY

Application Support Engineer with around 2 years of experience at TCS working in the telecom domain. Along with application support responsibilities, I gained hands-on experience in Flutter-based mobile application development, contributing to building and maintaining user-friendly mobile features and supporting mobile-related components within enterprise systems. I have experience working with Flutter, Dart, REST APIs, Firebase Authentication, and third-party integrations to develop responsive mobile applications. My role also involved troubleshooting production issues, ensuring system reliability, and supporting large-scale enterprise applications in a dynamic environment. This combination of development exposure and production system support has strengthened my ability to build stable, scalable applications while maintaining high system performance and user experience.

WORK EXPERIENCE

Service Professional

Feb 2024 - Feb 2026

Tata Consultancy Service

Project: **BT – British Telecom (Data Integrity Team)**

Work as part of the Data Integrity Team supporting BT's telecom service platforms, ensuring accurate data management across core services including landline, mobile telephony, broadband, and digital television.

- Monitor and maintain telecom service data integrity to ensure reliability across enterprise systems.
- Investigate and resolve data discrepancies impacting telecom service provisioning and customer experience.
- Support backend systems and APIs used by telecom platforms, assisting in troubleshooting production issues in a live enterprise environment.
- Collaborate with cross-functional teams including development and system engineering teams to improve system workflows and operational efficiency.
- Gain exposure to mobile application workflows and API integrations used in telecom service management platforms.
- Document issues, provide technical analysis, and escalate complex system problems for faster resolution.

Flutter Developer

July 2023 - Nov 2023

Hysas Technologies pvt Ltd

- Contributed to **Pocket Giving**, a UK-based charity app, assisting with Flutter development and integrations.
- Developed **Cine App** (movie streaming) and **Food Order App** (food ordering).
- Worked with Flutter & Dart, integrating **GraphQL & RESTful APIs** for efficient data handling.
- Utilized **Cloudinary** for media storage and **Hasura** for real-time database management.
- Implemented **RazorPay** for payments and **Firebase Authentication** for secure access.

SKILLS

- Languages: Flutter, Dart, Basics of Python
- State Management: BLoC (Business Logic Component)
- APIs: RESTful APIs, GraphQL
- Cloud: Google Cloud Platform (GCP), Cloudinary
- Database: Hasura
- Authentication & Security: Firebase Authentication
- Payment Gateway: Razorpay
- UI/UX Design: Figma
- Version Control: GitHub
- Tools: Google Cloud AI (GCP Gen AI)
- Telecommunications Knowledge: Landline, Mobile Telephony (SIM plans), Broadband, Digital Television, Telecommunications Equipment

CERTIFICATES

- Associate Google Cloud Engineer – Google Cloud Platform (GCP)
- Generative AI
- Flutter for Beginners
- AI & Prompt Engineering Certifications:
- ChatGPT, Midjourney
- ChatGPT 4, Bard & DALL·E – The AI Bible
- ChatGPT 4 Prompt Writing

EDUCATION

Bachelor of Computer Science

Kamaraj College Arts & Science, Thoothukudi
CGPA: **7.89**

July 2019 – July 2022

Computer Science

Bell Matriculation Hr Sec School, Thoothukudi
Percentage: **57.16**

Jun 2018 – Apr 2019
